

SNOW TUBING

The Science of Snow Tubing is a 3-hour educational program offered at Wild Mountain that teaches the laws of physics in a hands-on learning environment. Students will have the opportunity to witness the laws of physics firsthand, including the following principles:

WORK * POWER * FORCE * KINEMATICS * SPEED * ACCELERATION

Once the physics lab is complete, students will have free time to snow tube down our 500 ft tubing hill! This field trip includes tube rentals, conveyor rides up the hill, equipment needed to complete the experiments, student workbooks, and fun for everyone! Wild Mountain does not provide teaching staff at any of the stations. Lunch packages and Snack Bar purchases are available.

Monday – Thursday (Non-Holiday)

Minimum 75 People

Cost: \$20 Per Person

**ADVANCED RESERVATIONS
ARE REQUIRED.**

Schedule your trip today by contacting Tubing Group Sales at 651-465-6365 or emailing group@wildmountain.com.
